FRUIT SUBTRACTION

Solve the subtraction equations below.

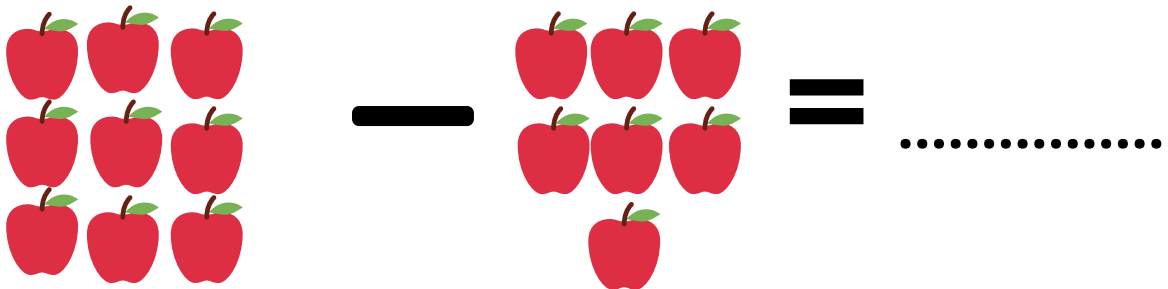

A subtraction problem using blueberries. On the left, there are two groups of three blueberries each, totaling six. A minus sign is in the middle. On the right, there is one group of three blueberries. An equals sign follows, and then a dotted line for the answer.

$$6 - 3 = \dots\dots\dots$$

A subtraction problem using pineapples. On the left, there are two rows of four pineapples each, totaling eight. A minus sign is in the middle. On the right, there are three pineapples. An equals sign follows, and then a dotted line for the answer.

$$8 - 3 = \dots\dots\dots$$

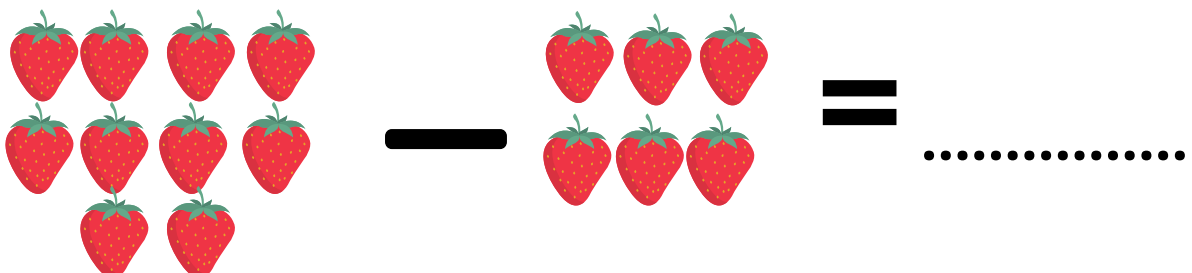

A subtraction problem using apples. On the left, there are three rows of three apples each, totaling nine. A minus sign is in the middle. On the right, there are seven apples (two rows of three and one single apple). An equals sign follows, and then a dotted line for the answer.

$$9 - 7 = \dots\dots\dots$$

A subtraction problem using pears. On the left, there are two rows of three pears each, totaling six. A minus sign is in the middle. On the right, there are five pears (one row of three and one row of two). An equals sign follows, and then a dotted line for the answer.

$$6 - 5 = \dots\dots\dots$$

A subtraction problem using strawberries. On the left, there are three rows of four strawberries each, totaling twelve. A minus sign is in the middle. On the right, there are six strawberries (two rows of three). An equals sign follows, and then a dotted line for the answer.

$$12 - 6 = \dots\dots\dots$$

SUBTRACTION WHEEL

Complete these subtraction wheels.

Remember to check your answers!

SUBTRACTION

Complete the Empty circles with the right numbers, so that the result of the subtraction is 2.

The puzzle is structured as follows:

- Top: A circle containing the number 8.
- Below 8: A minus sign (-).
- Middle row: Three empty circles.
- Below the middle row: An equals sign (=).
- Right side: A circle containing the number 2.
- Below 2: A minus sign (-).
- Bottom row: Three empty circles.
- Below the bottom row: An equals sign (=).
- Bottom: A circle containing the number 4.
- Below 4: A minus sign (-).
- Bottom-most: A circle containing the number 3.

Horizontal subtraction problems are connected to the central chain:

- Left side: A circle containing the number 6, followed by an equals sign (=), and then a circle containing the number 2.
- Right side: A circle containing the number 2, followed by an equals sign (=), and then a circle containing the number 5.
- Bottom: A circle containing the number 5, followed by a minus sign (-), and then an empty circle.
- Top: An empty circle, followed by a minus sign (-), and then a circle containing the number 6.
